SUMMARY

DevOps Engineer with 3+ years of experience designing, automating, and securing cloud infrastructure across AWS, Azure, and GCP. Leading DevSecOps initiatives with expertise in container orchestration (Kubernetes, OpenShift), Infrastructure as Code (Terraform, Bicep), and observability solutions for reliable systems. Experienced in GitOps with ArgoCD, dynamic autoscaling with Karpenter, zero-trust secrets management with Vault, and AI inference workloads.

EXPERIENCE

Dviz Technologies Inc. *DevOps Engineer*
Nov 2025 – Present

- Lead DevSecOps initiatives, establishing zero-trust secrets, container security, and GitOps standards.
- Deployed and managed multi-tenant infrastructure on AWS with autoscaling EKS clusters.
- Configured dynamic node autoscaling using Karpenter and KEDA on EKS to optimize cloud spend.
- Built GitOps pipelines with ArgoCD and Helm, integrating SAST scanning and container signing.
- Integrated HashiCorp Vault and External Secrets Operator for automated zero-trust secret rotation.
- Configured NVIDIA GPU Operator and deployed scalable, containerized LLM inference workloads.
- Enforced cluster security with Kyverno policies, default-deny network rules, and WireGuard.
- Built observability with OpenTelemetry and Grafana for metrics, log aggregation, and distributed tracing.

Slangit Technologies FZCO. *DevOps Engineer (Part-time)*
Nov 2025 – Present

- Configured Microsoft Azure infrastructure with secure VNets, private endpoints, and Entra ID governance.
- Deployed and operated container workloads on Red Hat OpenShift with RBAC and ingress controllers.
- Automated cloud environment provisioning across GCP and Azure using reusable, modular Bicep templates.

Dynamic Solution Innovators Ltd. *Junior DevOps Engineer*
Sep 2023 – Aug 2025

- Built CI/CD pipelines using Jenkins, ArgoCD, and GitHub Actions, automating with Bash and Python.
- Deployed microservices on Kubernetes with GitOps and blue-green/canary deployment strategies.
- Managed AWS and DigitalOcean infrastructure using Terraform and Ansible for automated configuration.
- Introduced observability stack (Prometheus, Grafana, OpenTelemetry), improving incident visibility across teams.

BJIT Academy Ltd. *Trainee DevOps & Cloud Engineer*
Apr 2023 – Jul 2023

SKILLS

Infrastructure & Cloud: Linux, AWS, Azure, GCP, Docker, Kubernetes, OpenShift, Karpenter, KEDA
IaC & Automation: Terraform, Bicep, Ansible, Bash, Python
CI/CD & DevOps Tools: Jenkins, ArgoCD, Git, GitHub Actions, Helm, Kustomize
Observability: Prometheus, Grafana, CloudWatch, OpenTelemetry
Security: HashiCorp Vault, External Secrets, Kyverno, Trivy, RBAC, Network Policies
Databases: MySQL, PostgreSQL, Oracle, MSSQL, Redis
Programming & Testing: Java, JavaScript, Jest, K6
AI Platform Tools: NVIDIA GPU Operator, LLM Inference, MinIO

CERTIFICATIONS

Certified Kubernetes Administrator - The Linux Foundation Sep 2024 – Sep 2026

EDUCATION

Khulna University *B.Sc. in Computer Science and Engineering*
Jan 2018 – Feb 2023
