SUMMARY

DevOps and Platform Engineer with 3+ years of experience designing, automating, and securing cloud infrastructure across AWS, Azure, and GCP. Skilled in container orchestration (Kubernetes, OpenShift), Infrastructure as Code (Terraform, Bicep), and observability solutions for reliable systems. Experienced in GitOps with ArgoCD, dynamic autoscaling with Karpenter, zero-trust secrets management with Vault, and AI inference workloads.

EXPERIENCE

Dviz Technologies Inc. *DevOps Engineer*
Nov 2025 – Present

- Deployed and managed scalable multi-tenant infrastructure on AWS and GCP with autoscaling Kubernetes (EKS).
- Configured node autoscaling using Karpenter and KEDA on AWS EKS to optimize compute resources and cloud spend.
- Built GitOps CI/CD workflows with ArgoCD and Helm for auditable, declarative, and repeatable deployments.
- Integrated HashiCorp Vault and External Secrets Operator for secrets management and automated rotation.
- Configured NVIDIA GPU Operator and deployed containerized LLM inference workloads using Ollama.
- Enforced cluster security with Kyverno and network policies; integrated SAST and SCA scanning into CI/CD pipelines.
- Built observability with OpenTelemetry and Grafana stack, including log aggregation and alerting for audit trails.

Slangit *DevOps Engineer (Part-time)*
Nov 2025 – Present

- Configured Microsoft Azure cloud infrastructure with secure VNets, resource groups, and identity governance.
- Deployed and operated enterprise container workloads on Red Hat OpenShift, managing RBAC, ingress, and operators.
- Automated cloud environment provisioning across GCP and Azure utilizing modular Azure Bicep configurations.

Dynamic Solution Innovators Ltd. *Junior DevOps Engineer*
Sep 2023 – Aug 2025

- Built CI/CD pipelines using Jenkins, ArgoCD, and GitHub Actions, automating with Bash and Python.
- Deployed microservices on Kubernetes with GitOps and blue-green/canary deployment strategies.
- Managed AWS and DigitalOcean infrastructure using Terraform and Ansible for automated configuration.
- Introduced observability stack (Prometheus, Grafana, OpenTelemetry), improving incident visibility across teams.

BJIT Academy Ltd. *Trainee DevOps & Cloud Engineer*
Apr 2023 – Jul 2023

SKILLS

Infrastructure & Cloud: Linux, AWS, Azure, GCP, Docker, Kubernetes, OpenShift, Karpenter, KEDA
IaC & Automation: Terraform, Bicep, Ansible, Bash, Python
CI/CD & DevOps Tools: Jenkins, ArgoCD, Git, GitHub Actions, Helm, Kustomize
Observability: Prometheus, Grafana, CloudWatch, OpenTelemetry
Security: HashiCorp Vault, External Secrets, Kyverno, Trivy, RBAC, Network Policies
Databases: MySQL, PostgreSQL, Oracle, MSSQL, Redis
Programming & Testing: Java, JavaScript, Jest, K6
AI Platform Tools: Ollama, NVIDIA GPU Operator, MinIO

CERTIFICATIONS

Certified Kubernetes Administrator - The Linux Foundation Sep 2024 – Sep 2026

EDUCATION

Khulna University *B.Sc. in Computer Science and Engineering*
Jan 2018 – Feb 2023
