SUMMARY

DevOps Engineer with 3+ years of experience designing, automating, and securing cloud infrastructure across AWS, Azure, and OpenShift. Skilled in container orchestration (Kubernetes, Docker), Infrastructure as Code (Terraform), and observability solutions for reliable systems. Experienced in GitOps with ArgoCD, dynamic autoscaling with Karpenter, zero-trust secrets management with Vault, and automated CI/CD pipelines.

EXPERIENCE

Dviz Technologies Inc.  *DevOps Engineer*
Nov 2025 – Present

- Deployed and managed scalable infrastructure on AWS, Azure, and OpenShift with autoscaling Kubernetes.
- Configured node autoscaling using Karpenter and KEDA on AWS EKS to optimize compute resources.
- Built GitOps CI/CD workflows with ArgoCD and Helm for auditable, repeatable deployments.
- Managed containerized workloads with Docker and Kubernetes across multi-cloud environments.
- Integrated HashiCorp Vault and External Secrets Operator for secrets management and rotation.
- Enforced cluster security guardrails with Kyverno and network policies to secure pod communications.
- Applied SAST and SCA scanning in the pipeline to mitigate vulnerabilities, following a shift-left approach.
- Built observability with OpenTelemetry and Grafana stack, including log collection and alerting for audit trails.
- Configured NVIDIA GPU Operator to enable GPU acceleration for containerized AI inference workloads.

Dynamic Solution Innovators Ltd.  *Junior DevOps Engineer*
Sep 2023 – Aug 2025

- Built CI/CD pipelines using Jenkins, ArgoCD, and GitHub Actions, automating with Bash and Python.
- Deployed microservices on Kubernetes with GitOps and blue-green/canary deployments.
- Managed AWS and DigitalOcean infrastructure using Terraform and Ansible for configuration.
- Introduced observability stack (Prometheus, Grafana, OpenTelemetry), improving visibility across teams.

BJIT Academy Ltd.  *Trainee DevOps & Cloud Engineer*
Apr 2023 – Jul 2023

SKILLS

Infrastructure & Cloud: Linux, AWS, GCP, Docker, Kubernetes, OpenShift, Karpenter, KEDA

IaC & Automation: Terraform, Ansible, Bash, Python

CI/CD & DevOps Tools: Jenkins, ArgoCD, Git, GitHub Actions, Helm, Kustomize

Observability: Prometheus, Grafana, Fluent Bit, CloudWatch, OpenTelemetry

Security: HashiCorp Vault, External Secrets, Kyverno, Trivy, RBAC, Network Policies

Databases: MySQL, PostgreSQL, Oracle, MSSQL, Redis

Programming & Testing: Java, JavaScript, Jest, K6

AI Platform Tools: vLLM, NVIDIA GPU Operator, MinIO

CERTIFICATIONS

Certified Kubernetes Administrator - The Linux Foundation Sep 2024 – Sep 2026

EDUCATION

Khulna University  *B.Sc. in Computer Science and Engineering*
Jan 2018 – Feb 2023
