SUMMARY

DevOps Engineer with 3+ years of experience designing, automating, and securing cloud infrastructure across AWS, Azure, and OpenShift. Skilled in container orchestration (Kubernetes, Docker), Infrastructure as Code (Terraform, Bicep), and observability solutions for reliable, scalable systems. Improved deployment speed and audit readiness by building CI/CD pipelines with Jenkins, Argo, and GitHub Actions, and enforcing RBAC, network policies, and automated security scanning. Committed to driving DevOps best practices and building an automation-first culture.

EXPERIENCE

- Dviz Technologies Inc.**
Nov 2025 – Present

DevOps & QA Engineer

 - Deployed and managed scalable infrastructure on AWS, Azure, and OpenShift with autoscaling Kubernetes.
 - Built GitOps CI/CD workflows with ArgoCD and Helm for auditable, repeatable deployments.
 - Managed containerized workloads with Docker and Kubernetes across multi-cloud environments.
 - Integrated HashiCorp Vault for secrets management, enforcing RBAC and network policies.
 - Applied SAST and SCA scanning in the pipeline to mitigate vulnerabilities, following a shift-left approach.
 - Built observability with OpenTelemetry and Grafana stack, including log collection and alerting for audit trails.
- Dynamic Solution Innovators Ltd.**
Sep 2023 – Aug 2025

Junior DevOps Engineer

 - Built CI/CD pipelines using Jenkins, ArgoCD, and GitHub Actions, automating with Bash and Python.
 - Deployed microservices on Kubernetes with GitOps and blue-green/canary deployments.
 - Managed AWS and DigitalOcean infrastructure using Terraform and Ansible for configuration.
 - Introduced observability stack (Prometheus, Grafana, OpenTelemetry), improving visibility across teams.
- BJIT Academy Ltd.**
Apr 2023 – Jul 2023

Trainee DevOps & Cloud Engineer

SKILLS

Infrastructure & Cloud: Linux, AWS, GCP, Docker, Kubernetes, OpenShift
IaC & Automation: Terraform, Ansible, Bash, Python
CI/CD & DevOps Tools: Jenkins, ArgoCD, Git, GitHub Actions, Helm
Observability: Prometheus, Grafana, Fluent Bit, CloudWatch, OpenTelemetry
Security: HashiCorp Vault, Trivy, RBAC, Network Policies
Databases: MySQL, PostgreSQL, Oracle, MSSQL, Redis
Programming & Testing: Java, JavaScript, Jest, K6

CERTIFICATIONS

Certified Kubernetes Administrator - The Linux Foundation Sep 2024 – Sep 2026

PROJECTS

- **eMarket** – Built full-stack e-Commerce app (Vue.js, Node.js, MySQL, Stripe) with automated testing (Jest)
- **Smart Diary** – Flutter app with Node.js backend, Typescript, and MongoDB for task and note management.
- **GitOps Practice** – Designed GitOps workflow using ArgoCD for Blue Green and Canary Deployment.

EDUCATION

Khulna University
Jan 2018 – Feb 2023

B.Sc. in Computer Science and Engineering
